

# YORK® YGWS Water-Cooled Screw Chiller

## A budget chiller for all applications

The YORK® YGWS series is a budget solution for a wide range of light commercial and process cooling solutions.

### Features and benefits

- **Ultra-high efficiency:** ECBC-compliant series with hybrid falling-film evaporator to ensure highly optimized heat transfer.
- **Stepless compression:** High-efficiency semi-hermetic twin-screw compressor with optimized motor allows stepless unloading from 100 percent to 25 percent.
- **Green refrigerant:** HFC-134a refrigerant has zero impact on global warming and does not have a phase-out date under the Montreal Protocol.
- **Compact design for small spaces:** Can fit into small plant rooms and spaces with low height clearances.
- **Remote chiller control:** Fitted with a microprocessor unit that allows users to monitor equipment remotely using Modbus connectivity through a Building Automation System (BAS).

**YORK® YGWS chillers are supplied, installed, and serviced by Johnson Controls exclusive channel partners across the country. Contact us to learn more.**
